2. Arrangements were made with [REDACTED] to take care of reproduction. 25X1C8c  
The volume is in great demand within [REDACTED] and [REDACTED] requested that I have the copying done as quickly as possible, so that the atlas 25X1X7 would not be out of circulation longer than absolutely necessary. Accordingly, the volume was microfilmed, rather than copied by photostat as we had originally planned.
